

Download the application named Grand stream Wave for your device from your application store. You could download other freeware app as well to use the NT easy service.

After installing the application on your device.

Go to setting  → Account Settings → Click “+” to add new SIP account → Click “SIP Account”

Follow the configuration as follows:

Configure the details for your NT Easy account as highlighted in red box.

Your password will be current password + _Ntc1. Example: Your current login password is 236790 then your new password will be 236790_Ntc1

After adding the SIP account details add the Network settings as:

NETWORK SETTINGS

Proxy-Require

Outbound Proxy
202.70.74.178:5060

Secondary Outbound Proxy

NAT Traversal >
Keep-Alive

DNS Mode >
A Record

User the Outbound Proxy IP as mentioned in the Red box.

Now the configuration for your SIP account (NT easy phone account is complete)

Check the box to enable the account and use the service.

Activate Account

< Account Settings +

SIPp

NT Easy

NT Easy

NT Easy Phone Ready to use (Account is registered)

Account not activated (box not checked)

Your Configuration/ password is wrong, please verify again, easy phone not registered.

==== End of configuration for your SIP account ====
